

What is Corian®

杜邦™可丽耐®

corian.

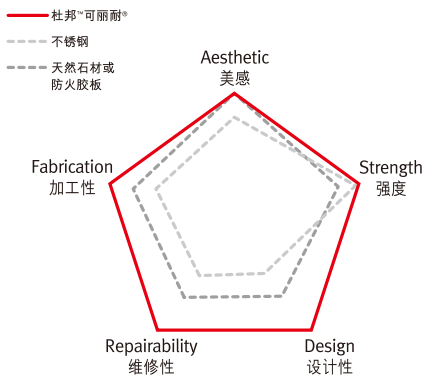

Let your Imagination Run Free

突破无限 创造无限可能

Let your imagination run free
Corian® is the original solid surface material made by DuPont. Corian® is an advanced composite of natural minerals (aluminium-tri-hydrate, 55%), acrylic (MMA, 40%) and color pigment (5%) developed as a practical material for living. Corian® offers design versatility, function and durability, which is an ideal material to be fabricated into virtually any design.

突破限制，创造无限可能杜邦™可丽耐®的专利科学方法，摆脱天然物料难以加工的缺点，成功糅合天然矿物(氢氧化铝，55%)、树脂中特有的MMA(40%)和颜料(5%)，创造出可媲美天然物料的质感，令产品散发有如接触大自然般的温馨舒泰的感觉，而且可塑性高，实用性强，是任意设计的理想素材。

Aesthetic

Colors and pattern running through the entire thickness of material offers elegant touch and feel, making it an ideal aesthetic material for interior designers.

Fabrication

It is easy to fabricate with Corian® such as hole-drilling. Edges can be built to look thicker, and long counters can be easily made in pieces in the workshop and inconspicuously joined together at the installation site, greatly reducing installation time.

Repairability

Stains can be easily removed by cleanser, and scratches can be repaired without marks.

Design

Corian® is workable like wood. Sheets can be combined with our adhesives to make the joints inconspicuous, allowing any design come true.

Strength

- Resistant to impact — take 12mm Corian® as an example, there is no crack for a 450g iron ball at a falling height of 90cm.
- Resistant to heat — yellow stains by cigarette burns can be removed by abrasive cleaner. No visible changes if placing a 350 degree Celsius frying pan onto the surface for 5 minutes, but we recommend using heat insulation mat under the fry pan to make Corian® more durable.
- Resistant to chemicals — sterilizers, cosmetics, food acids, acrylic acids and alcohol would not penetrate into Corian® under daily normal use.
- UV Resistances — Corian® contains methacrylic acid that is UV-resistant, which makes it an ideal material for windowsill, outdoor furniture and exterior wall cladding, etc

美感

表里一致的花纹和色调给人以高级的质感和触感，是室内设计中追求美感表现的材料。

加工性

可以轻易为可丽耐®进行加工和钻孔。此外，专用的接缝黏合剂更可在安装现场接合组成L形的工作台面甚至是U形的厨房装饰用天花板，大大缩短施工时间。

维修性

简单的污渍可用去污剂轻易清除。刮损划痕亦可以轻易修复，不留痕迹。

设计性

拥有与硬木一样的可塑性。接口处可以使用专用的接缝黏合剂接合，做到不明显的接缝效果，使任何设计构思得以实现。

强度

- 耐撞击 — 以12mm的可丽耐®为例，它可以承受一个450g重的钢球从90cm高处直坠下撞击而无任何损伤，证明可丽耐®拥有耐撞击性。
- 耐燃性 — 可以承受香烟的灼热程度，并可用于一般厨房及天花板。即使将350度高温的平底锅置于台面上五分钟亦不会出现损伤。不过，建议在直接放置热锅时加用隔热垫来保护柜面，以延长使用寿命。
- 耐药品性 — 无论是消毒杀菌药品、化妆品、食用酸、丙烯酸及酒精等化学物质在日常使用的情况下均不会侵害可丽耐®实心面材，确保安心使用。
- 阳光直射的位置也可安心使用 — 杜邦™可丽耐®拥有的甲基丙烯酸甲酯是高度防紫外线的物质，可安心用于窗台、户外家具以及外墙等。

Environmental Friendly

保护环境

是世界的潮流
也是我们的追求

DuPont™ Corian® solid surfaces and joint adhesive all have low VOC (volatile organic compound) content. A number of countries have established guidelines and regulations related to the VOC content and emissions of building materials to ensure indoor air quality. Corian® solid surfaces are made from high quality acrylic ingredients, and produced in several manufacturing facilities around the world. Once the ingredients of Corian® are fully reacted (polymerized) in the manufacturing process, they become a chemically stable solid surfacing material with minimal impact on indoor air quality. Besides, Corian® is durable and renewable that fulfills the goal of sustainable design, reducing environmental footprint.

杜邦™可丽耐®实体面材及其同色胶水的VOC含量极低，符合国际性GREEN-GUARD标准。VOC是挥发性有机化合物(Volatile Organic Compound)的简称，很多国家或地区都管制VOC的含量，以减少物料释放出的气味，提高室内空气质量。而杜邦™可丽耐®以高品质的丙烯酸制成，生产技术高超，过程严谨，令产品得到最佳的化学稳定效果，绝不会释出如VOC或二噁英等有害物质，保证室内空气质量。另外，杜邦™可丽耐®持久耐用，容易翻新，可持续使用和配合设计更改，迎合不同的风格转变，缔造新鲜感之余，也能减少资源浪费，保护环境。

杜邦™可丽耐®燃烧时生产的气体

结果
无发现

食品卫生机关认证

公告符合美国国家卫生基金会(NSF)51号规格(全部颜色)

Non-toxic

Corian® is an inert, non-toxic, hypoallergenic material. Under normal temperature conditions it does not emit gases. Corian® benefits from the flame-retardant characteristics of aluminium-tri- hydrate; the smoke is optically light and does not contain toxic halogenated gases.

Zero Soluble Toxic Ingredient

Ensuring cooking utensil does not release toxic ingredients after spillage is of paramount importance. Corian® is non-porous and no toxic ingredients are released after water spillage, proving it safe for food preparation.

NSF Standard 51

All colors of Corian® fulfil the requirement of the National Sanitation Foundation (NSF) Standard 51, proving that Corian® is safe for direct food contact, and is an ideal surface for food preparation.

无毒性

可丽耐®为无毒及不引起过敏的物料。在正常温度下，并不会释出气体。即使在燃烧时，也不会释出有毒气体及二噁英。

水溶性有害物质：零

确保食用器具、厨具不会藉水份渗透出有害物质尤其重要。杜邦™可丽耐®的水溶测试结果显示无有害物质，证实可以安心用于处理食物。

美国国家卫生基金会标准第51项

杜邦™可丽耐®所有颜色均合乎美国国家卫生基金会标准(NSF)第51项，证明美国杜邦™可丽耐®可与食物直接接触，及属于适合准备/处理食物范围。

Care and Maintenance 与 保养与维护

Preventing heat damage 预防热力破坏

Corian® is an excellent material for heat resistance. As with all countertop materials, it is important to minimize direct heat exposure to protect your surface and investment. We recommend using heat trivets or hot pads when placing hot objects on any surface. Allow cookware to cool before placing it on any surface or into a Corian® sink.

可丽耐®是耐热的优质面材。与其他面材一样，减少直接热力接触，对保护您的面材及投资是十分重要的。我们建议在摆放沸热器皿时，可使用耐热垫板或具有橡胶垫的三脚架。把器皿放入可丽耐®星盆前，请先将其冷却。

Preventing other damage 预防其他损害

In most cases Corian® can be repaired if accidentally damaged. However, be sure to follow the guidelines here to prevent any permanent damage to Corian®.

- Avoid exposing Corian® to strong chemicals, such as paint removers, oven cleaners, etc. If contact occurs, quickly flush the surface with water.
- Do not cut directly on Corian® countertops.
- Boiling water alone will not damage your Corian® sink, however it's a good practice to run your faucet while pouring boiling water into your sink.

一般而言，可丽耐®台面遭受的损坏均可被修复，但请务必遵从以下指示，以避免永久性的损坏

- 避免让可丽耐®接触强力化学品，如去漆剂、烤箱清洁剂等。如不小心接触，请尽快用水冲洗表面。
- 请勿直接在可丽耐®表面上切割。
- 滚烫的水不会破坏可丽耐®星盆，但最好在倒滚烫的水进星盆时，打开冷水龙头。

Removing minor cuts and scratches 去除切痕及刮伤

Because the solid beauty of Corian® goes all the way through, Corian® surfaces are completely renewable. You can remove minor cuts and scratches yourself by following these instructions.

- Judge the severity of the scratch and start with the finest grit sanding pad to remove the scratch. (The color of the pads from roughest to smoothest are: White, Yellow, Green, Peach, Lilac, Blue, Gray.) Rub over scratch in a straight line to remove it. Periodically switch rubbing direction 90°. Be sure all of the scratch is removed. If this first step takes too long, try the next heavier grit sanding pad. To minimize dust during sanding, wet the surface. Rinse pad periodically to clean residue.
- Clean top with water. Select next lighter grits until desired gloss level is achieved. Rinse out all pads used and air dry before putting them away.

可丽耐®具更新性特质，使其受到切痕或刮伤亦可修复至完整如新。可依照以下指示来去除切痕或刮伤。

- 判断刮痕的严重程度，由最细的砂纸开始清除刮痕。(砂纸由粗到细以下列颜色作区分：白、黄、绿、桃、淡紫、蓝、灰)。以直线方式打磨，来去除刮痕。偶尔转为以直角90度方向来打磨。请确保所有刮痕均被去除。若第一步骤花太多时间，可换粗一级的砂纸。先把台面打湿，以减轻打磨时所产生的尘埃。定期冲洗砂纸，以清除残渣。
- 用水清洗台面。用细一级的砂纸重复以上步骤。大范围地作打磨，以使磨砂效果更均匀。冲洗所有使用过的砂纸，风乾后才收藏。

All Finishes		所有表面	
Most dirt & residue	Use soapy water or ammonia based cleaner, rinse and wipe dry.	大部份脏物及污垢	使用肥皂水或一般清洁去污剂，擦干。
Water marks	Wipe with damp cloth and wipe dry.	水渍	先用湿布将水渍拭去，再用干布擦干。
Difficult residue	Spray residue with Deep Cleaner for DuPont®Corian® from Stone Care International, wait for about 30 seconds for cleaner to work. Wipe dry with a paper towel. If residue persists, repeat process. If residue still persists, follow directions for removing scratches.	较难去除的污垢	在污垢上喷上Stone Care International®的强力清洁剂，等待30秒，让清洁剂发挥效用，再用纸巾擦干。若仍有污渍，可重复以上步骤。若仍未能清除污渍，请依照去除切痕和刮伤的步骤。
Disinfecting	Occasionally wipe surface with dilute household bleach (50 part water/1 part bleach). Rinse to pthoroughly with water and wipe dry.	消毒方法	偶尔以经稀释的家庭用漂白水擦拭表面(50份水/1份漂白水)。用水充分冲洗，再用干布擦干净。

Refurbishing Finished Gloss Level		不同光泽表面	
Matte	Rub entire surface with a green Scotch-Brite® pad in a circular motion. Rinse surface with water and wipe dry.	不光泽/哑光面	用绿色的Scotch-brite®*百洁布以划圈方式擦拭整个表面。用水清洗表面，然后擦干。
Semi-gloss	Use a countertop polish (see list below) to help hide scratches and blend in a uniform gloss level.	半光泽表面	使用台面磨光剂来隐藏刮痕，并均匀地融入光泽表面。
High-gloss	Follow steps for semi-gloss or contact your dealer to arrange for professional refurbishment.	高度光泽表面	依照半光泽表面所示的步骤，或与经销商联络，以安排作专业磨光。

Sinks & Lavatories		水槽及洗面盆	
Cleaning	Follow procedures above or use Soft Scrub®** and a green Scotch-Brite®** pad to remove residue. Rub green Scotch-Brite®*pad over entire sink to blend in finish.	清理方法	依照以上步骤，或使用Soft Scrub®**及用绿色的Scotch-Brite®*百洁布来去除残余污渍，为了令表面均匀，请使用绿色的Scotch-Brite®*百洁布来擦拭整个水槽。
Disinfecting	Occasionally fill sink 2/3 full with diluted household bleach (50 part water/1 part bleach). Let stand for over night, then wash sides and bottom as solution drains. Rinse sink with water.	消毒方法	除了日常的清理外，偶尔可倒入约2/3水槽容量，比例为50份水/1份漂白水让其浸泡过夜，再用水冲洗。

Dark, heavily pigmented Colours of Corian® will show scratches, dust and ordinary wear and tear more readily than lighter, textured colours. We recommend that these colours not be used in applications where the surface is exposed to heavy use and contact (i.e. worktops). These colours are most suitable for applications where surface contact is light and for use as inlays and accent colours. For more information on selecting the ideal Colour of Corian® for your application, please consult with your DuPont™ Corian® representative.

深色可丽耐®表面相比浅色可丽耐®容易显现划痕、灰尘和一般的磨损痕迹。我们建议深色可丽耐®最好不要用于操作较频繁的台面(例如操作台)。这些颜色更适用于受损率较少的台面或者作为局部镶嵌和强调使用。想获取更多关于如何挑选适用于您的理想可丽耐®色彩的信息, 请咨询当地的杜邦销售代表。
