Dark, heavily pigmented Colours of Corian®, will show scratches, dust and ordinary wear and tear more readily than lighter, textured colours. We recommend that these colours not be used in applications where the surface is exposed to heavy use and contact (i.e. worktops). These colours are most suitable for applications where surface contact is light and for use as inlays and accent colours. For more information on selecting the ideal Colour of Corian® for your application, please consult with your DuPont™ Corian® representative.

深色可丽耐®表面相比浅色可丽耐®容易显现划痕、灰尘和一般的磨损痕迹。我们建议深色可丽耐®最好不要使用于操作较频繁的台面(例如操作台)。这些颜色更适用于受损率较少的台面或者作为局部镶嵌和强调使用。想获取更多关于如何挑选适用于您的理想可丽耐®色彩的信息,请咨询当地的杜邦销售代表。
